Hamcom 2011 was held in Plano, TX. It was also the ARRL national convention. We had a prominent display there and several presentations. They were exceedingly well attended. Look in the [HSMM Files](#) area for specifics. The ARRL is cranking up a get involved with ham radio push and shot quite a bit of video while at Hamcom. They have released a promo to their web site and to YouTube. HSMM-MESH is prominently featured.
